Vendor: CheckPoint

Exam Code:156-215.75

Exam Name: Check Point Certified Security Administrator

Version: Demo

QUESTION 1

Which of the following commands will completely remove the Security Policy from being enforced on a Security Gateway?

A. fw unload

B. fw unloadlocal

C. cpstop

D. fw unload local

Correct Answer: B

QUESTION 2

Your main internal network 10.10.10.0/24 allows all traffic to the Internet using Hide NAT. You also have a small network 10.10.20.0/24 behind the internal router. You want to configure the kernel to translate the source address only when network 10.10.20.0 tries to access the Internet for HTTP, SMTP, and FTP services. Which of the following configurations will allow this network to access the Internet?

A. Configure three Manual Static NAT rules for network 10.10.20.0/24, one for each service

B. Configure one Manual Hide NAT rule for HTTP, FTP, and SMTP services for network 10.10.20.0/24

C. Configure Automatic Hide NAT on network 10.10.20.0/24 and then edit the Service column in the NAT Rule Base on the automatic rule

D. Configure Automatic Static NAT on network 10.10.20.0/24

Correct Answer: B
