Vendor:SAP

Exam Code:C_BW4HANA_27

Exam Name:SAP Certified Application Associate - Reporting Modeling and Data Acquisition with SAP BW/4HANA 2.x

Version: Demo

QUESTION 1

Which properties determine the delta process within the Operational Data Provisioning (ODP) delta

management for DataSources?

Note: There are 2 correct answers to this question.

A. Serialization

B. Delta type

C. Record mode

D. Parallelization

E. Record type

Correct Answer: AC

QUESTION 2

You set up the 2LIS_02_ITM (Purchasing Line Item) data source in SAP ERP using the logistics cockpit. Afterward, you successfully run the initialization into SAP BW/4HAN

A. Your delta load into SAP BW/4HANA shows zero records even though new purchase orders were created. How do you explain that the delta records do NOT appear in SAP BW/4HANA?

B. A reinitialization for sales orders in SAP ERP was triggered using the logistics cockpit, which deleted the purchase order item initialization.

C. All old purchase orders in SAP ERP were archived overnight before the delta loads.

D. Purchasing extractors in SAP ERP were set up with Queued Delta update mode and the collective run job was NOT scheduled.

E. Another SAP BW/4HANA system already picked up the new purchase orders using a delta load

Correct Answer: C

QUESTION 3

Why do you define a custom table as a row store table? Note: There are 2 correct answers to this question.

A. The table will be integrated into a native SAP HANA calculation view.

B. Aggregation and fast search is required for query execution.

C. When the table is accessed, all columns of a single record are processed.

D. The values in the columns are different. Therefore, data compression would NOT have much effect.

Correct Answer: CD

QUESTION 4

What must you do first if you need to define help cells for formulas in the cell editor?

A. Define two formulas in a structure.

B. Define two structures in a query.

C. Define two selections in a structure.

D. Reuse a structure in a second query.

Correct Answer: B

QUESTION 5

Which objects can you use as components in a CompositeProvider in SAP BW/4HANA? Note: There are 2 correct answers to this question.

A. BW query

B. Open ODS view

C. CompositeProvider

D. Semantic group

Correct Answer: BC

QUESTION 6

You need to use an SAP ERP standard DataSource to load data into SAP BW/4HANA.

Which prerequisite must be fulfilled to use the DataSource in the Operational Data Provisioning context?

A. lt must exist in table ROOSATTR.

B. It must be delta-enabled.

C. It must be in-memory-optimized.

D. It must have a queue entry in transaction ODQMON.

Correct Answer: A

QUESTION 7

You loaded a 5 MB table from a source system to SAP BW/4HAN

A. How do you explain that the size of the table is reduced to 1 MB?

B. The target is defined as column store and a delta merge job was executed.

C. The target is defined as row store and a delta merge job was executed.

D. The target is defined as row store without delta merge execution.

E. The target is defined as coiumn store without delta merge execution.

Correct Answer: A

QUESTION 8

Which SAP BW/4HANA objects can keep persistent data? Note: There are 2 correct answers to this question.

A. Key figure InfoObjects

B. InfoSource

C. Characteristics InfoObjects

D. DataStore object (advanced)

Correct Answer: CD

QUESTION 9

What must you do if you want to use an object from BI Content?

A. Copy the BI Content object into the customer name space.

B. Convert the object from A version to D version.

C. Activate the object in the Data Warehousing Workbench.

D. Identify the BI Content objects in SAP HANA studio.

Correct Answer: C

QUESTION 10

You need to consume remote HADOOP data in your SAP HANA Native App. Which components can you use? Note: There are 3 correct answers to this question.

A. SAP HANA smart data access

B. SAP HANA smart data integration

C. SAP HANA SQL Controller

D. Spark SQL adapter

E. SAP Vora ODBC adapter

Correct Answer: ADE

QUESTION 11

You need to integrate data from several SAP systems and non-SAP systems to support real-time analytics. Why do you recommend the SAP Landscape Transformation (SLT) Replication Server for real-time data replication into SAP HANA?

A. The SLT Replication Server provides flexible multisystem support to manage data replication from SAP and non-SAP source systems.

B. The SLT Replication Server provides log reader adapters for SAP and non-SAP sources.

C. The SLT Replication Server installed on a productive SAP BW/4HANA system improves the data transfer process.

D. Replication Server installation and configuration is always identical for SAP and non-SAP source systems.

Correct Answer: A

QUESTION 12

Your main BW query contains a characteristic value variable with a replacement path from a query. When is the pre-query executed?

A. Each time the main query is executed, before the filter values are applied.

B. Each time the main query is executed, after the filter values are applied.

C. Directly after a predefined broadcasting event was triggered to calculate the pre-query.

D. Directly after data is loaded to the InfoProvider of the pre-query.

Correct Answer: A
