Immediately after this change, the VNX administrators begin to receive certificate errors when they attempt to connect to the array. You need to advise them on how to regenerate the Control Station\\'s certificate authority and web server certificates.

Which command should be used?

A. server_certificate

B. server_security

C. nas_ca_certificate

D. nas_license

Correct Answer: C

QUESTION 4

In Unisphere Analyzer, what are two possible views when you right-click a RAID group?

A. LUN I/O Disk Detail and Performance Detail

B. Performance Detail and I/O Size Distribution Summary

C. LUN I/O Disk Detail and I/O Size Distribution Detail

D. Performance Detail and I/O Size Distribution Detail

Correct Answer: A

QUESTION 5

A customer logs in to Unisphere as an administrator and tries to delete a storage group, but is unable to do so. What must the customer do to delete this storage group?

A. Make sure no hosts are connected to the storage group

B. Make sure no LUNs are present in the storage group

C. Delete the storage group from Navisphere Secure CLI

D. Enter Engineering mode to delete the storage group

Correct Answer: A

QUESTION 6

A company has decided to use CAVA as their antivirus solution. Which protocol does CAVA use to support antivirus protection in a Celerra environment?

A. Common Internet File System

B. Multi Protocol File System

C. Network File System

D. File Transfer Protocol

Correct Answer: A

QUESTION 7

A FAST VP Pool is configured with 1,000 GB of Flash, 5,000 GB of SAS, and 25,000 GB of NL- SAS drives. Four thick LUNs of 2,000 GB each are created at 30 minute intervals with default configuration parameters. How will data be distributed initially on the fourth LUN that is created?

A. 0 GB on Flash; 0 GB on SAS; 2,000 GB on NL-SAS

B. 80 GB on Flash; 320 GB on SAS; 1,600 on NL-SAS

C. 666 GB on Flash; 666 GB on SAS; 668 GB on NL-SAS

D. 250 GB on Flash; 1,250 GB on SAS; 500 GB on NL-SAS

Correct Answer: A

QUESTION 8

Which three metrics can UnisphereQoS control?

A. Throughput, queue length, utilization

B. Bandwidth, response time, service time

C. Response time, bandwidth, throughput

D. Service time, seek distance, throughput

Correct Answer: C

QUESTION 9

What monitoring option is used for file system and network performance?

A. Background Tasks for File

B. Statistics for File

C. Event Logs for File

D. Notification Logs for File

Correct Answer: B

QUESTION 10

A customer has a requirement for restartable backups of an SQL database and the SQL log LUN. How can this requirement be met?

A. Create VNX Consistency Group containing the database and log LUNs Create VNX Snapshot of Consistency Group Mount VNX Snapshot Set on backup server

B. Create VNX Snapshot of database LUN Create VNX Snapshot of SQL log LUN Mount VNX Snapshots on backup server

C. Create VNX Consistency Group containing the database and log LUNs Mount the database LUN directly on the backup server Mount the log LUN directly on the backup server

D. Create SnapView clone of database LUN Create SnapView clone of log LUN Mount clone LUNs on database server

Correct Answer: A

QUESTION 11

A customer is planning to add a new VNX array to their ESXi environment. What benefit will the VAAI plug-in provide?

A. VNX-provided storage capabilities to vCenter

B. Online LUN migration

C. Virtualmachinefault tolerance

D. Hardware acceleration

Correct Answer: D

QUESTION 12

In order to ensure that role-based access is enforced, the VNX storage domain has implemented two administrative groups called Auditors and Storage Admins. One of the administrators is a member of both groups. What access to objects will that administrator inherit?

A. The least restrictive privilege established by the two groups

B. The most restrictive privilege established by the two groups

C. The first group that the administrator joined

D. The last group that the administrator joined

Correct Answer: A
