### QUESTION 1

Which statement is always true about runtime filters and queries?

- A. Users are limited to three values when using runtime filters.
- B. Runtime filters can be set against fields that are not displayed on the query.
- C. When using runtime filters, the user must apply filters before seeing the results of the query.
- D. Runtime filters allow the system to dynamically alter results (for example based on the record that initiated the query)

Correct Answer: B

---

### QUESTION 2

Which workflow type will be a Pre-Create workflow?

- A. Subflow
- B. System
- C. Synchronous
- D. Asynchronous

Correct Answer: C

---

### QUESTION 3

An editable report has been created with the name triPeople - triRetired - Editable. The report designer wants to allow the user to be able to unretire multiple records. The designer has properly set the query to be editable and has selected the proper state. When the designer goes to the query's Advanced tab to set the actions that will be available to the user, he finds that option is not available. What could be the problem?

- A. The report has been created from the My Reports Tab.
- B. There are no editable fields in the triRetired state so no actions are allowed.
- C. The query is of type Report. Queries of type Report cannot be made editable.
- D. The record is not editable for that state so no actions are available from the editable query.

Correct Answer: A

---

### QUESTION 4

If using a Retrieve Records task whose source object is the Start Task and the object to be retrieved is related to the object of the Start Task by a Locator Field, which option in the From Records section would be the best to use?
