QUESTION: 3
A trucking company employs a small IT shop but is heavily information-driven. The IBM Maximo Asset Management (Maximo) implementation will drive the business using a help desk (opening work orders) and a repair facility among the functions to be delivered.
These facts have been gathered using interviews from the customer sponsor:

- There will be 20 (maximum) help desk operators with an open Maximo application screen at all times.
- The company has IBM WebSphere applications driving their commerce systems today.
- There will be 70 (maximum) mechanics reviewing any given asset record at one time, all using an Internet Explorer browser.
- There are 6,200 employees at the company.
- There will be 10 (maximum) finance department members who will print an estimated 20,000
pages of BIRT reports each month.
- There will be 2,000 integration transactions per hour.
When working to produce an architecture for the trucking company, which two factors should be taken into consideration for sizing the environment? (Choose two.)

A. total number of employees
B. J2EE specifications for memory for the JVM5
C. Types of integration transaction to be processed
D. Volume of integration to be processed
E. Number of customizations to Maximo business objects.

Answer: B, D
