**Exam Name:**CVE-2

**Version:**Demo

### QUESTION 1

When Ordering ISDN for Video Conferencing H.320, the most important request of information from the Network Provider is

- A. length of the Copper Wire used for BRI or PRI medium at customer premise.
- B. Switch Interoffice Facilities type
- C. Switch Vendor Name.
- D. Switch Protocol being used.

Correct Answer: D

---

### QUESTION 2

Which of the following is the ITU-T Visual Telephony Standard that outlines specific details of Gateway Operations?

- A. H.260 Series
- B. H.285 Series
- C. H.230 Series
- D. H.248 Series

Correct Answer: D

---

### QUESTION 3

Which of the following correctly describes typical audio phantom power?

- A. 12 volts DC applied to the tip and ring of a TRS connector used to power amplified headphones
- B. A DC voltage applied to pins 2 and 3 of an XLR connector returning through pin 1, used to power microphones
- C. A DC voltage applied to the center pin of an RCA type connector used to power remote pre- amplifiers
- D. 48 volts DC applied to a telephone circuit center pair used to provide power to the telephone set

Correct Answer: B

---

### QUESTION 4

Pick the best match; Audio "Critical Distance" is a definition that relates to:

- A. Distance between the walls, floor to ceiling, and doorways

- B. Distance between the audio amplifier inputs and room microphone
- C. Distance between the video display monitor and camera
- D. Distance between the person speaking and the microphone used

Correct Answer: D

---

#### **QUESTION 5**

What ITU-T Standard specifies the Framing and Multiplexing of Audio, Video, Data, and Control used in

- A. H.221
- B. H.200
- C. H.201
- D. H.220

Correct Answer: A

---

#### **QUESTION 6**

Which of the following is the channel used to carry the Audio for H.320 Terminals?

- A. Channel 4
- B. Channel 6
- C. Channel 1
- D. Channel 2
- E. Channel 3

Correct Answer: C

---

#### **QUESTION 7**

The Bandwidth on Demand Interoperability Group created four modes for standardized Inverse Multiplexing.

Which mode is best compatible with H.320/221 Video Conferencing?

- A. Mode 4
- B. Mode 1
- C. Mode 2
- D. Mode 3

Correct Answer: B

---

**QUESTION 8**

What does Automatic Gain Control (AGC) do?

- A. It turns down the volume to the far-end microphone.
- B. It turns up the volume to the far-end microphone.
- C. It builds the volume to the near-end microphone.
- D. It selects among multiple microphones.

Correct Answer: C

---

**QUESTION 9**

Public Internet may be properly and securely connected to the Private Domain Intranet for quality videoconferencing by using which of the following components lists?

- A. Analog Modem, Repeaters, Fire Wall, and Network Address Translation System
- B. Broadband Interface, Network Address Translation System, and Analog Modem
- C. Repeater, Fire Wall, and Network Address Translation System
- D. Broadband Interface and Router
- E. Broadband Interface, Router with Fire Wall and Network Address Translation System

Correct Answer: E

---

**QUESTION 10**

T1 trunks are capable of supporting up to

- A. 2 - 384,000 bit per second connections.
- B. 4 - 384,000 bit per second connections.
- C. 5 - 384,000 bit per second connections.
- D. 3 - 384,000 bit per second connections.

Correct Answer: B

---

**QUESTION 11**

High Definition Video connections include which of the following? (select two)

- A. One DB 25 Connector attached to several COAX cables
- B. Four 3.5mm Mini plugs attached to one COAX cable per connector plug
- C. Three BNC connectors attached to one COAX cable per connector
- D. One DB 15 HD connector attached to three COAX cables
- E. Three XLR connectors attached to one COAX cable per connector

Correct Answer: CD

---

### QUESTION 12

Which four digital interfaces are capable of operating at rates up to 2 Million Bits per second?

- A. X.25
- B. X.21
- C. RS530
- D. RS-232
- E. V.35
- F. Q.931
- G. RS449
- H. V.25

Correct Answer: BCEG
