Vendor:Oracle

Exam Code:1Z0-028

Exam Name:Oracle Database Cloud Administration

Version:Demo

QUESTION 1

Your company is planning to implement a Cloud computing mode/ and has the following requirements:

- Developers will be self-service who request application server environments for development.
- Database administrators will be self-service users who request databases for development projects.
- During peak development periods, you must provide resources to handle unexpected workload demands.

Which two Cloud Service and Deployment modes achieve these objectives?

- A. Software as a Service for databases on a Hybrid Deployment Model
- B. Platform as a Service for databases on a Hybrid Deployment Model
- C. Platform as a Service for databases on a Community Deployment Model
- D. Software as a Service for application server environments on a Hybrid Deployment Model
- E. Platform as a Service for application server environments on a Hybrid Deployment Model
- F. Infrastructure as a Service for databases on a Hybrid Deployment Model

Correct Answer: BD

QUESTION 2

Which two are true regarding the use of custom consolidation scenarios when using Enterprise Manager 12c Cloud Control Consolidation Planner?

- A. Mutually exclusive source servers that may not map to the same destination server may be defined based on nodes of a Real Application Cluster (RAC) database.
- B. Compatible source servers that may map to the same destination server must match on three or more criteria.
- C. Metric data to be used to estimate source server demand can be restricted to a date range.

Correct Answer: AB

QUESTION 3

How does the National Institute of Standards and Technology define a Hybrid Cloud?

- A. A combination of community and public Clouds for a single organization
- B. Separate environments for use by multiple organizations
- C. A combination of private and public Clouds for a single organization
- D. A common environment for use by a group of related organizations

E. A combination of private and public Clouds for multiple organizations

Correct Answer: C

QUESTION 4

Which two are examples of resources that may be pooled and measured by Cloud providers in a Cloud computing environment?

- A. Workstations
- B. CPU
- C. Tablespaces
- D. Filesystems
- E. Memory

Correct Answer: BE

QUESTION 5

How can database homes be pooled together into Database as a Service (DBaaS) pools by using the Enterprise Manager Cloud Control 12c self-service provisioning portal?

- A. They may be pooled together by major and maintenance release only if they are on the same operating system platform.
- B. They may be pooled together by major, maintenance, Fusion Middleware, and component- specific release if they are on different operating system platforms.
- C. Single-instance database homes of the same major, maintenance, Fusion Middleware, and component-specific release may be pooled together if they are on the same operating system platform.
- D. RAC database homes of the same major, maintenance, and component-specific release may be pooled together if they are on the same operating system platform.

Correct Answer: C

QUESTION 6

What are two ways in which Cloud computing will benefit a company with traditional computing implementations?

- A. Consumers may focus properly on resources allocated to their business area
- B. Better return on investment from software
- C. Flexibility in deploying resources as required
- D. Consumer's capital expenditure can become traditional expenses

Correct Answer: BC

QUESTION 7

Which two must be selected when using the Enterprise Manager 12c Cloud Control Consolidation Planner to assist in assessing IT infrastructure usage?

- A. Destination host targets
- B. Source host targets
- C. Duration of metric data for analysis
- D. A preconfigured consolidation scenario
- E. A custom consolidation scenario

Correct Answer: CE

QUESTION 8

Which two cloud network functions can be defined by Enterprise Manager Cloud Control 12c?

- A. Heartbeat
- B. Preboot execution environment (PXE)
- C. Storage
- D. Backup
- E. Multicast

Correct Answer: DE

QUESTION 9

Which three are important considerations for the Cloud computing model from a Cloud provider's perspective?

- A. Meeting agreed service levels
- B. Flexibility in meeting consumer demand
- C. Cost
- D. Use of the latest technology
- E. Efficient use of computing resources
- F. The underlying visualization technology used in the Cloud

Correct Answer: ACE

QUESTION 10

Which two cloud service types as defined by the National Institute of Standards and Technology (NIST) may be used for self-service provisioning of an Oracle Database Environment?

- A. Infrastructure as a Service
- B. Software as a Service
- C. Platform as a Service
- D. RAC as a Service
- E. SQL as a Service

Correct Answer: AC

QUESTION 11

Which two are true about Enterprise Manager Cloud Control 12c pools in Platform as a Service (PaaS) Zones?

- A. The pools in PaaS zones may be collections of one or more Oracle Database Homes of the same platform and version.
- B. The pools in PaaS zones may be collections of one or more Oracle Middleware Homes of different platforms, as long as they are of the same template.
- C. The pools in PaaS zones may be collections of one or more Oracle Database Homes of different platforms, as long as they are of the same version.
- D. The pools in PaaS zones may be collections of one or more Oracle Middleware Homes of the same platform and version.
- E. The pools in PaaS zones may be collections of one or more Oracle Database Homes of different versions, as long as they are on the same platform.
- F. The pools in PaaS zones may be collections of one or more Oracle Middleware Homes of the same platforms, as long as they are of different templates.

Correct Answer: AD
