Exam Name:VCE Vblock System Deployment and
Implementation –Virtualization

Version:Demo

QUESTION 1

Migrating a host to the Nexus 1000V requires what information? (Choose two.)

- A. source port group
- B. VSM IP address
- C. vNIC failover policy
- D. DVUplink port group

Correct Answer: AD

QUESTION 2

Which VNX drive type should be used for ESXi boot LUNs?

- A. largest available NL-SAS
- B. largest available SAS
- C. smallest available SAS
- D. smallest available EFD

Correct Answer: C

QUESTION 3

While using the vSphere Client, you are experiencing high latency between issuing a search and obtaining a response from one of the four vCenter servers configured for LinkedMode. When using the vSphere Web Client, the inventory tree does not load properly and often shows objects out of date. How would you improve the troubleshooting process?

- A. Update the logging level in vCenter to verbose, and restart the vCenter services.
- B. Update the logging level for the Inventory Service to TRACE, and restart the Inventory Service.
- C. Update the ESXi logging level to verbose, and restart the host.
- D. Update the logging level for the Inventory Service to verbose, update the vCenter service to verbose, and restart all the services.

Correct Answer: B

QUESTION 4

Which steps should be performed to install PowerPathVE updates to the ESXi host through VMware Update Manager (VUM)?

- A. Enter maintenance mode, import patches, create the baseline, attach the baseline, and remediate host.
- B. Disconnect the ESXi host, import patches, create the baseline, attach the baseline, and remediate host.
- C. Import patches, create the baseline, attach the baseline, and install updates.
- D. Import patches, reboot the ESXi host, create the baseline, attach the baseline, and remediate host.

Correct Answer: A

QUESTION 5

Which three disk formats would be used on an NFS data store? (Choose three.)

- A. thin
- B. thick
- C. 2gbsparse
- D. eagerzeroedthick
- E. rdmp

Correct Answer: ABC

QUESTION 6

A vSphere cluster is presented a large number of data stores with similar sizes and capabilities for a virtual machine. The customer asks how to handle virtual machine placement and lower operational overhead. How should the customer proceed?

- A. Dedicate and provision data stores on a per VM basis.
- B. Use Powerpath VE for multi-path data store access.
- C. Leverage storage vMotion for VM placement.
- D. Create a data store cluster and leverage storage DRS.

Correct Answer: D

QUESTION 7

A customer requests a disjointed Layer 2 configuration on their ESXi hosts to segregate DMZ traffic. Which additional component is required in this configuration?

- A. disjointed Layer 2 licensing
- B. an access control list for DMZ VLAN

- C. a second Cisco Nexus 1000V
- D. an extra set of physical adapters

Correct Answer: D

QUESTION 8

Which three components are part of the Vblock System Release Certification Matrix? (Choose three.)

- A. VMware vSphere hypervisor ESXi
- B. VMware vSphere Server
- C. VMware vCloud Director
- D. VMware vSphere Client
- E. VMware vCenter Operations Manager

Correct Answer: ABD

QUESTION 9

You upgrade an ESXi 4.x host to an ESXi 5.x host using VMware Update Manager. It appears to complete the installation, but the system does not boot. You decide to roll back the host to the previous build. After using the Shift-R option on boot up, you receive the error "No alternative hypervisor to roll back to". What is causing this error?

- A. The hardware is not supported with the ESXi 5.x.
- B. The ISO file in the baseline is corrupt.
- C. The data store containing the operating system has become corrupt.
- D. There are differences in the boot loaders between the two versions.

Correct Answer: D

QUESTION 10

The ESXi 5.0 servers appear to have hardware problems after you have powered up the Vblock System

320. You want to view the log files for the ESXi servers. What are two ways to accomplish this task? (Choose two.)

- A. Use the Technical Support Mode CLI.
- B. Use the vSphere Client.
- C. Use Powershell.
- D. Use the Service Console.

Correct Answer: AB

QUESTION 11

You are asked to add two virtual machines to host ESXi01. The host IP address is 1t2.165.138.4. When you attempt to access the host using the vSphere client, you receive the following error message?

The vSphere client could not connect to 1t2.165.138.4. You do not have permission to login to server 1t2.165.138.4.

What would generate this error message?

- A. The wrong IP address was used in the vSphere client.
- B. Lockdown mode is enabled on host ESXi01.
- C. Host ESXi01 has been powered of.
- D. Host ESXi01 is in maintenance mode.

Correct Answer: B

QUESTION 12

Which operatng system requires additonal binaries to apply virtual machine customizaton

- A. Microsof Windows 2008
- B. Microsof Windows 7
- C. Microsof Windows 2003
- D. Red Hat Linux

Correct Answer: C
