- A. section
- B. standard
- C. control point
- D. policy

Correct Answer: C

---

### QUESTION 4

A backup job failed. The backup administrator needs to collect log files for the services and daemons that use Unified-style logging.

Which step must be performed by the backup administrator before sending the collected log files to Symantec technical

support for analysis?

- A. create log directories for the Symantec NetBackup services and daemons
- B. set the Global logging level setting to a value of 5
- C. run nbsu on the master server
- D. run nbcplogs on the master server

Correct Answer: D

---

#### QUESTION 5

The administrator of a large bank needs to preserve financial information for an extended period of time. The bank's Symantec NetBackup 7.5 catalog is now over 800 GB in size, causing the catalog backups to contend for resources with production system backups.

How can the administrator shorten the time needed to back up the Symantec NetBackup catalog?

- A. use the Symantec NetBackup 7.5 Agent for Symantec Enterprise Vault to perform an online archive of the Symantec NetBackup Catalog
- B. create a catalog archive policy and execute it from the command line using the catarc command
- C. use the Symantec NetBackup 7.5 client-side deduplication feature to shorten the time it takes to perform a Symantec NetBackup Catalog Backup
- D. back up the Symantec NetBackup catalog by scheduling an online Sybase database backup policy to allow the Catalog Backup to run without contending for resources with the production system backups

Correct Answer: B

---

#### QUESTION 6

Which two are supported methods of populating the asset system? (Select two.)

- A. bv-Control Network Mapper
- B. XML Import
- C. data collectors (ESM/RMS)
