Exam Name:Designing Cisco Enterprise Networks

Version:Demo

QUESTION 1

What should you do if you are looking at a strategic win with a customer and the customer wants to examine Cisco ISE for longer than a few weeks?

- A. Give them some of our flash files that can be played on any browser.
- B. Set them up with an account on a Cisco UCS server that hosts ISE.
- C. Set them up with a dCloud account.
- D. Give them our ISE YouTube videos.
- E. Provide them with a downloadable POV lit.
- F. Point them to our dCloud demo library.

Correct Answer: C

QUESTION 2

What statement is true regarding the current time in Enterprise Networking history?

- A. advent of cloud computing
- B. pace of change
- C. pervasive use of mobile devices
- D. advent of IoT

Correct Answer: B

QUESTION 3

Which two primary categories are displayed on the overall health page of the assurance component in the Cisco DNA Center? (Choose two.)

- A. Wired
- B. Client
- C. Access-Distribution
- D. Server
- E. Core
- F. Network

Correct Answer: BF

QUESTION 4

Which element of the Cisco SD-WAN architecture facilitates the functions of controller discovery and NAT traversal?

- A. vBond orchestrator
- B. vManage
- C. vSmart controller
- D. vEdge

Correct Answer: A

QUESTION 5

Which two activities should occur during an SE's discovery process? (Choose two.)

- A. Establishing credibility with the customer
- B. Working with the customer to develop a reference architecture
- C. Referencing the PPDIIO model to effectively facilitate the discussion
- D. Gathering information about the current state of the customer's network environment
- E. Mapping Cisco innovation to customer's needs

Correct Answer: AD

QUESTION 6

Which three key differentiators that DNA Assurance provides that our competitors are unable match? (Choose three.)

- A. Support for Overlay Virtual Transport
- B. On-premise and cloud-base analytics
- C. Apple Insights
- D. VXLAN support
- E. Proactive approach to guided remediation
- F. Network time travel

Correct Answer: BEF

QUESTION 7

Which are two Cisco ISE that benefits our customers? (Choose two.)

- A. provides network access control
- B. helps them stop and contain real-time threats
- C. enables them to set traffic priorities across the network
- D. helps them accelerate application deployment and delivery

Correct Answer: AB

QUESTION 8

Which protocol runs between the vSmart controllers and between the vSmart controllers and the vEdge routers, and unifies all control plane functions under a single protocol umbrella?

- A. BGP
- B. OSPF
- C. IKE
- D. OMP
- E. VRRP

Correct Answer: D

QUESTION 9

Which two statements describes Cisco SD-Access? (Choose two.)

- A. programmable overlays enabling network virtualization across the campus
- B. an automated encryption/decryption engine for highly secured transport requirements
- C. software-defined segmentation and policy enforcement based on user identity and group membership
- D. a collection of tools and applications that are a combination of loose and tight coupling
- E. an overlay for the wired infrastructure in which traffic is tunneled via a GRE tunnel to a mobility controller for policy and application visibility

Correct Answer: AC

QUESTION 10

Which three options focus of the current digital business era? (Choose three.)

- A. IoT scale

- B. connectivity
- C. virtualized services
- D. automation
- E. centralized enterprise and web applications
- F. Human scale

Correct Answer: ACD

QUESTION 11

What is the easiest way to enable SD-Access for all your remote sites after you have your campus SD-Access fabric up and running?

- A. Treat all sites as one fabric domain and use the traditional physical network as the underlay.
- B. Use a separate fabric domain for each site and use SD-WAN as the underlay.
- C. Use a separate fabric domain for each site and use the traditional physical network as the underlay.
- D. Treat all the sites as one fabric domain and use SD-WAN as the underlay.

Correct Answer: D

QUESTION 12

Which two options are primary functions of Cisco ISE? (Choose two.)

- A. providing VPN access for any type of device
- B. providing information about every device that touches the network
- C. enabling WAN deployment over any type of connection
- D. automatically enabling, disabling, or reducing allocated power to certain devices
- E. enforcing endpoint compliance with network security policies
- F. allocating resources

Correct Answer: BE
