- C. Box
- D. DialogField

Correct Answer: B

QUESTION 6

Isaac, the systems developer, is working on a new table that contains information about employees who have used company cars. He wants to add a relation to EmpITable and it should only show employees who have the status employee.

Which relation is the best one to use?

- A. Normal
- B. Special
- C. Field fixed
- D. Related field fixed

Correct Answer: D

QUESTION 7

In order to obtain the best performance, it is appropriate to always:

- A. Place all database accessing code in classes.
- B. Only access data directly by calling stored procedures.
- C. Use as few System calls as possible.
- D. Concentrate database accessing code in tables.

Correct Answer: D

QUESTION 8

Which of the following names adheres to naming conventions for Table Maps?

- A. MapCustVend
- B. CustVend_Map
- C. Map_CustVend
- D. CustVendMap

Correct Answer: D

QUESTION 9

When is it appropriate to define table relations directly on tables instead of using the extended data types?

- A. When one field in a table relates to one field in another table.
- B. When multiple fields in a table define one relation to multiple fields in another table.
- C. When one field in a table relates to multiple fields in another table.
- D. Never; relations should always be set up on the extended data types.

Correct Answer: B

QUESTION 10

Which of the following sections of code include an example of a loop statement? Choose the two that apply.

- A. `if (custTable.ReclD){custTable.update();}`
