A. Thrust

B. Helps cool the engine

C. Moves airplane nose up and down

D. Moves the airplane nose left and right

Correct Answer: B

QUESTION 6

What is an insect scientist called?

A. 6

B. Mass

C. Entomologist

D. Platelets

Correct Answer: C

QUESTION 7

Straight and level flight

A. All 4 primary ctrls used (ailerons, elevator, throttle and rudder)

B. Main maneuver Constant heading and altitude is maintained Wing tips even with horizon

C. Not considered a major component of an aircraft structure

D. Shallow 20 degrees Medium 20-45 degrees Steep 45+ degrees

Correct Answer: B

QUESTION 8

Flashing red light signal from the tower to aircraft approaching to land

- A. Airport is unsafe for landing
- B. Produce thrust
- C. Horizontal component of lift
- D. Greater lift and more drag

Correct Answer: A

QUESTION 9

Trim

- A. All 4 primary ctrls used (ailerons, elevator, throttle and rudder)
- B. Used to relieve all possible control pressures held after desired altitude has been attained
- C. Shallow 20 degrees Medium 20-45 degrees Steep 45+ degrees
- D. Main maneuver Constant heading and altitude is maintained Wing tips even with horizon

Correct Answer: B

QUESTION 10

Right Triangle

- A. Triangles same shape but not same size.
- B. Triangles which are identical.
- C. Triangle with a 90 degree right angle.
- D. Longest side of a right triangle. Other sides are called LEGS

Correct Answer: C

QUESTION 11

Rhombus

- A. 360 degrees Circumference is the length around
- B. All four sides equal but 2 are slanted
- C. Two sides parallel but two are not
- D. Line going across the circle, 1/2 circle

Correct Answer: B

QUESTION 12

In creating lift

- A. The air moving over the wing moves faster than the air moving under the wing
- B. Produce thrust
- C. Right
- D. Pushing the rudder peddles

Correct Answer: A
