Vendor:IBM

Exam Code:C2030-280

Exam Name:IBM Cloud Computing Infrastructure
Architect V1

Version:Demo

QUESTION 1

A construction company has outsourced its IT operations (storage, hardware, servers, networking components, etc.) to a service provider. The service provider owns this equipment and is responsible for running and maintaining it. The construction company pays the service provider on a per-use basis.

What type of cloud service is the construction company using?

- A. Platform as a Service
- B. Software as a Service
- C. Infrastructure as a Service
- D. Business Process as a Service

Correct Answer: C

QUESTION 2

What is a critical and unique component during the design and planning process for a cloud service?

- A. IT Service availability
- B. Business Service availability
- C. IT Infrastructure/Component availability
- D. IT Service and Infrastructure/Component availability

Correct Answer: B

QUESTION 3

What are two IT infrastructure architecture principles that must be followed when designing a cloud network infrastructure? (Choose two.)

- A. Wide area networks should be excluded to ensure system isolation.
- B. Always construct networks with three tiers to ensure routing capability.
- C. Design to accommodate shared networks with differentiated service levels.
- D. Networks must scale without adding complexity or sacrificing performance.
- E. Network intrusion detection should always be external to the cloud infrastructure.

Correct Answer: CD

QUESTION 4

When designing for the protection of data stored in the cloud, including the deployment of firewall configurations, which two conditions must be included? (Choose two.)

- A. deny access from untrusted sources or applications
- B. map network interfaces and firewall locations for customer distribution
- C. detect back-level personal firewall software on customer desktops and laptops
- D. prohibit direct access from external interfaces into the restricted network zones
- E. install personal firewall software on all active servers within the cloud infrastructure

Correct Answer: AD

QUESTION 5

What is WebSphere Application Server Hypervisor Edition?

- A. It is a hypervisor optimized for running WebSphere software.
- B. It is a tool for managing virtual machines containing WebSphere Application Server instances.
- C. It is a virtual image that contains a complete middleware software stack optimized to run on hypervisors.
- D. It is a cloud management tool that allows a company to build, deploy, and manage middleware environments in a cloud.

Correct Answer: C

QUESTION 6

Which cloud service model(s) are supported by the IBM Cloud Computing Management Platform Reference Architecture? 1) Software as a Service (SaaS) 2) Platform as a Service (PaaS) 3) Infrastructure as a Service (IaaS) 4) Business Process as a Service (BPaaS)

- A. 3
- B. 2 and 3
- C. 1, 2, and 3
- D. 1, 2, 3, and 4

Correct Answer: D

QUESTION 7

What are two key IBM cloud workload definitions? (Choose two.)

- A. security
- B. virtualization
- C. collaboration
- D. business process
- E. infrastructure compute

Correct Answer: CE

QUESTION 8

Cloud Infrastructure security design should include which safeguarding principle against physical access?

- A. fingerprinting
- B. body scanners
- C. metal detectors
- D. closed circuit television

Correct Answer: D

QUESTION 9

A company's business model relies on continually delivering new versions of their end-user applications to the marketplace.

Which characteristic of the cloud computing service delivery model should improve the company's ability to deliver these newer version applications?

- A. service elasticity
- B. self-service access
- C. usage-based billing
- D. rapid service provisioning

Correct Answer: C

QUESTION 10

Security in the network is enhanced by including which two services in the cloud infrastructure? (Choose two.)

- A. intrusion prevention services
- B. intelligent switch hardware that is self-healing
- C. virtual network isolation to secure multi-tenant domains
- D. auditing of file and file system ownership and permissions
- E. DHCP with short term leases to make tracking IP addresses more difficult

Correct Answer: AC

QUESTION 11

What is a design consideration for loosely coupled systems?

- A. auto-scaling
- B. using queues
- C. bootstrapping
- D. inter process communication

Correct Answer: B

QUESTION 12

What are the two main categories of management services required for delivering and managing cloud services? (Choose two.)

- A. Business Support Services
- B. Business Process Services
- C. Operational Support Services
- D. Sensor Management Services
- E. Information Analytics Services

Correct Answer: AC
