### QUESTION 1

A seller can be configured to create a chained order if inventory can be procured from a different Vendor. IBM Sterling Selling and Fulfillment Suite provides configuration to suppress chained order creation even though the seller requires chained order. Which organization level is most appropriate for setting this configuration?

- A. Node Level
- B. Buyer Level
- C. Carrier Level
- D. Enterprise Level

Correct Answer: D

---

### QUESTION 2

A company decides to deploy the IBM Sterling Order Management product in the cloud. The hosting service provider requires the installation to be performed by their own team. After the installation is complete, the release manager of the company verifies the installation. While verifying the installation, the release manager notices that including certain out-of-the-box JSP pages results in an error. On further investigation, the release manager detects that the factory setup was not loaded completely.

How will the resource manager identify the incomplete tables and load the missing data?

- A. There is no way to determine tables left incomplete by the factory setup. The database must be wiped clean and the installation performed again.
- B. The list of incomplete tables are available in the \*.xml restart files generated by the factory setup. The factory setup can be run again to load the missing data.
- C. Missing data in tables indicates permission issues. The application user must be re-created with permissions to perform insert, select, update and delete from tables.
- D. Incomplete tables can be identified by comparing their sizes with the sizes provided in the installation guide. The database must be wiped out clean and the installation performed again.

Correct Answer: B

---

### QUESTION 3

Which table is currently marked as a hang-off enabled table?

- A. YFS\_ORDER\_HEADER
- B. YFS\_RECEIPT\_HEADER

- C. YFS\_INVENTORY\_SUPPLY
- D. YFS\_INVENTORY\_DEMAND

Correct Answer: A

---

#### QUESTION 4

A retailer wants to create shipment invoices in the IBM Sterling Selling and Fulfillment Suite and send details of the invoices for which payments have been completely collected to the accounts system at the end of day. What will help achieve this?

- A. Navigate to Applications Manager > Applications > Distributed Order Management > Cross Application > Financials > Payment Rule, and set the publish Invoice Interval to 24 hours.
- B. Navigate to Applications Manager > Applications > Distributed Order Management > Cross Application > Financials > Payment Types, and set the nvoice Settlement Required flag for all payment types.
- C. Navigate to Applications Manager > Applications > Distributed Order Management > Cross Application > Financials > Payment Rule, and set the Publish Invoice drop down to Creation for the appropriate Payment Rule.
- D. Navigate to Applications Manager > Applications > Distributed Order Management > Cross Application > Financials > Payment Rule, and set the Publish Invoice drop down to Collection for the appropriate Payment Rule.

Correct Answer: D

---

#### QUESTION 5

In IBM Sterling Selling and Fulfillment Suite, what is the only Supply Type that is considered for Inventory Audits?

- A. WIP
- B. ONHAND
- C. INTRANSIT
- D. RESERVED

Correct Answer: B

---

#### QUESTION 6

While working with the IBM Sterling Selling and Fulfillment Suite the primary database crashes and the application server database connection pooling is not used. Which two options will move the database connection from the primary database to the secondary database?

- A. Modify the deployment.properties file to point to the secondary database.
- B. Modify the dbclassCache.properties file to point to the secondary database.

- C. Modify the customer\_overrides.properties file to point to the secondary database.
- D. Modify the dbverify script to point to the secondary database and then execute it.
- E. Modify the database parameters in the sandbox.cfg property file to point to the secondary database and then run the setupfiles script.

Correct Answer: CE

---

#### **QUESTION 7**

What are three valid component types that can be traced using System Management Console?

- A. Event
- B. Agent
- C. Action
- D. Transaction
- E. Health Monitor
- F. Application Console

Correct Answer: BEF

---

#### **QUESTION 8**

In IBM Sterling Selling and Fulfillment Suite Resource Hierarchy, how is the default search view determined when there are many search views for an entity?

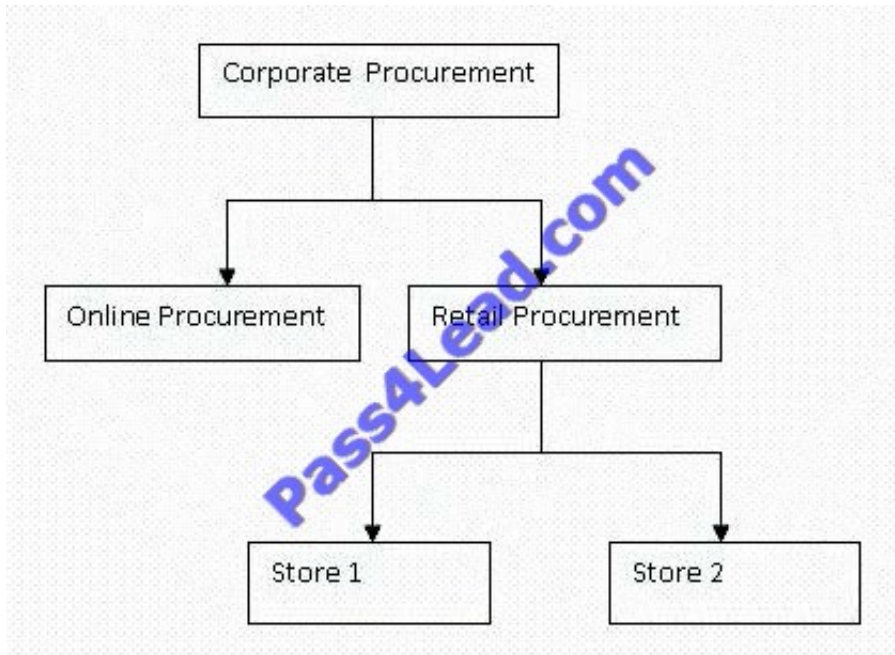

- A. the search view that was created first
- B. the search view that was created last
- C. the search view with the lowest resource sequence number
- D. the search view with the highest resource sequence number

Correct Answer: C

---

#### **QUESTION 9**

The customer hierarchy is defined as shown.

Which statement is true if a price list is assigned to Corporate Procurement and marked as sharable?

- A. The price list is only assigned to Corporate Procurement.
- B. The price list is automatically assigned to all the customers in the hierarchy.
- C. The price list is automatically assigned to Corporate, Retail and Online Procurement.
- D. The price list is automatically assigned to Online Procurement and Retail Procurement. D.The price list is automatically assigned to Online Procurement and Retail Procurement.

Correct Answer: B

---
