Exam Name:IBM SmartCloud Control Desk V7.5.1 IT
Asset Management Implementation

Version:Demo

QUESTION 1

When can the qualification status be changed to INACTIVE?

- A. After the labor has been approved.
- B. When a certification exists for the qualification.
- C. When the labor validation date is not in ACTIVE status.
- D. When the reference to the TOOLQUAI table is removed.

Correct Answer: A

QUESTION 2

What is an example of when deployed assets should be promoted?

- A. The asset management system is recently installed, and discovered data will be used to create a baseline of authorized asset records.
- B. Spreadsheet files are used to maintain asset information until now and asset data will be imported in the files and create asset records.
- C. Procurement is managed in another system. Integration Framework is used to synchronize the asset records between the two systems.
- D. The procurement process in IBM SmartCloud Control Desk is used for purchasing, receiving, and invoicing. A new asset is created when receiving a purchase order shipment.

Correct Answer: D

QUESTION 3

Which menu contains the View Assets application?

- A. Assets
- B. Inventory
- C. Self Service
- D. Administration

Correct Answer: D

QUESTION 4

What does Linked Asset in the Deployed Asset application refer to?

- A. A promoted asset linked to a deployed asset via promotion.
- B. Another deployed asset which links to Deployed Asset by reconciliation.
- C. An authorized asset linked to a deployed asset via the Integration Adapter.
- D. An authorized asset linked to deployed asset via the Deployed Data adapter.

Correct Answer: A

QUESTION 5

- A. manually enter the record in the Item Master
- B. automatically import from IBM Tivoli Integration Composer
- C. manually enter the record in the Software Catalog application
- D. automatically import using the Deployed Software application
- E. manually enter the record in the Deployed Software application

F. automatically import the Software Knowledge Base Catalog using the SWKBT cron task

Correct Answer: ACD

QUESTION 8

How is license reserve capacity increased?

- A. Select the license, select the Add/Modify Reservation option, change the value, and click OK.
- B. Select the license, enter a new row in the Associated Products section, and set the Allocated Capacity.
- C. Select the license, set the Reserved Capacity attribute on the License tab of the license, save the record once changes have been made.
- D. Select the license, on the Application Users tab of the Allocations section enter additional new employee rows as placeholders, save the record.

Correct Answer: D

QUESTION 9

Which two data sets can be reconciled? (Choose two)

- A. Items and Inventory
- B. Deployed Assets and Items
- C. Assets and Deployed Assets
- D. Assets and Non-Configuration Items

Correct Answer: BC

QUESTION 10

How is IBM software tracked in IBM SmartCloud Control Desk Software Catalog?

- A. Use the Type attribute on the Software Catalog record, and for any authorized IBM software set the attribute to AUTHORIZED.
- B. Use the Managed As attribute on the Software Catalog record, and for any authorized IBM software set the attribute to AUTHORIZED.
- C. Use the Reviewed check box on the Software Catalog record, and for any authorized IBM software make sure the check box is checked.
- D. Since this is IBM software, this would need to be done in the Software Catalog using the Software Knowledge Base Toolkit, not in IBM SmartCloud Control Desk.

Correct Answer: D
