Vendor:SAP

Exam Code:C_IBP_2202

Exam Name:SAP Certified Application Associate - SAP IBP for Supply Chain (2202)

Version: Demo

QUESTION 1

What actions can be performed in the Advanced Dashboards application? Note: There are 3 correct Answers to this question.

A. Rename the charts.

B. Add process templates.

C. Organize charts.

D. Display all assigned analytics on a single UI.

E. Link two analytics charts.

Correct Answer: BCD

QUESTION 2

What are some of the available ABC segmentation methods in IBP? Note: There are 2 correct Answers to this question.

A. By Pareto Principle (Sorted and Cumulated %)

B. By Number of Items (Sorted Average)

C. By Number of Items (Sorted Values)

D. By Pareto Principle (Sorted and Calculated Values)

Correct Answer: CD

QUESTION 3

You are invited to review a problem with a customer\'s SAP IBP Excel template performance. What areas with the biggest potential performance impact would you focus on? Note: There are 2 correct Answers to this question.

A. Number of local members and complexity of calculations

B. Complex calculation graphs for key figures

C. Excessive IBP formatting in Excel UI

D. Number of analytics charts displaying key figures\' values

Correct Answer: BC

QUESTION 4

While modeling for a large machine with high capital needs, you need it to run cost effectively with minimum utilization,

even if it means producing more than demand. Which solution would apply to this scenario? Note: There are 2 correct Answers to this question.

A. Capacity leveling will be possible for production and storage resources.

B. Excess stock can be generated and will need to be staged in an overflow warehouse.

C. Enough demands can be pulled forward and pull production will occur.

D. Balance can be achieved between excessive prebuild and minimum utilization by incorporating violation costs.

Correct Answer: CD

QUESTION 5

You want to set up demand sensing to analyze demand changes in execution or close to execution windows. Which of the following conditions must you consider during the setup? Note: There are 2 correct Answers to this question.

A. At setup test the system to run the demand sensing (full) algorithm weekly and the demand sensing (update) on a daily basis.

B. The result generates sensed demand data at the monthly time granularity for the full time horizon

C. Set up the forecast model to be executed at product-location level.

D. It is mandatory to load historical lag-based snapshot data.

Correct Answer: AD

QUESTION 6

You are modeling the introduction of a new product using Lifecycle Planning functionality in SAP IBP. What is mandatory to create in your planning area for the setup of reference product(s) to work? Note: There are 2 correct Answers to this question.

A. Planning objects for the new product

B. Definition of an attribute representing the product ID

C. Definition of Actual Sales business meaning for one key figure

D. Definition of an attribute representing the product description

Correct Answer: AB

QUESTION 7

What type of key figure requires a planning level to have all attributes as roots?

A. The conversion key figure, such as exchange rate

B. The special key figure marked as an aggregate key figure

C. The time independent key figure, such as FCSTMAPE

D. The attribute transformation key figure, such as PERIODID1

Correct Answer: B

QUESTION 8

Which features apply to quota violations modeled with the optimizer?

A. Quotas require sourcing ratios to be maintained.

B. Min and Max Quotas have to be the same as sourcing ratios.

C. Quota violation cost is maintained as an attribute as a key figure.

D. Quotas can be modeled for sourcing location, production, and consensus demand.

Correct Answer: A

QUESTION 9

Which of the following modes can you use when creating a constrained plan? Note: There are 2 correct Answers to this question.

A. Profit maximization

B. Delivery maximization

C. Resource maximization

D. Production maximization

Correct Answer: AB

QUESTION 10

You need to create time periods for the time profile in a planning area. What should you be aware of when executing the Create Time Periods application job?

A. This application job cannot be scheduled for immediate start.

B. A time profile has to be activated so that the application job can proceed.

C. This application job can be run for multiple time profiles at once.

D. The planning area with this time profile must be activated so that the application job can proceed.

Correct Answer: D

QUESTION 11

Which of the following are features of the SandOP process templates? Note: There are 2 correct Answers to this question.

A. All process templates are assigned to dashboards.

B. The number of steps in a process template is the same for all implementations.

C. Each step depicted in the template can have tasks associated with it.

D. New instances of templates allow for re-use of the same processes again.

Correct Answer: CD

QUESTION 12

You are working with the inventory optimization process and you want to use a what-if analysis. What parameters are assessed by this analysis? Note: There are 2 correct Answers to this question.

A. Changed variability

B. Service levels

C. Capacity consumption

D. Number of planning combinations

Correct Answer: AB
