Exam Name:System Administration (MS SQL DB)
with SAP NetWeaver 7.0

Version:Demo

QUESTION 1

To be sure that the SAP database can be restored without internal inconsistencies at any time, the database administrator needs to develop a strategy that guarantees a regular database backup together with a consistency check. With which scenarios can this goal be achieved? (Choose two)

- A. In the SQL Server Management Studio, schedule a regular job for a full database backup, selecting perform checksum before writing to the media option.
- B. In the SQL Server Management Studio, schedule a regular job with two steps, using the statement DBCC CHECKDBCONS (\\) in the first step and BACKUP DATABASE TO in the second step.
- C. In the DBA Planning Calendar DB13, schedule a regular job for the database consistency check and a subsequent job for the full database backup.
- D. In the SQL Server Management Studio, schedule a regular job with two steps, using the statement DBCC CHECKDB (\\) WITH NO_INFOMSGS in the first step and BACKUP DATABASE TO ... in the second step.

Correct Answer: CD

QUESTION 2

Consider an SAP system that is based on AS ABAP + AS Java (for example an SAP Exchange Infrastructure system). How does the Internet Communication Manager (ICM) "know" which browser-based requests are intended for the AS ABAP part and which requests are for the AS Java part?

- A. For systems based on AS ABAP + AS Java, the ICM can only distribute incoming request to the AS ABAP part. Requests to the AS Java part must be sent to the Java Dispatcher directly.
- B. By analyzing the URL prefix of the corresponding request and by comparing this request with the entries of the URL prefix table. Entries in the prefix table indicate requests for the AS ABAP part.
- C. By forwarding this request both to the dispatcher of the AS ABAP part and to the dispatcher of the AS Java part of the instance. Only the "correct" dispatcher will execute this request.
- D. By evaluation of a session cookie from the browser.

Correct Answer: B

QUESTION 3

Which features are created automatically once you define a transport domain controller in an (ABAP-based) SAP landscape? (Choose four)

- A. The transport profile for the transport control program tp is generated in the file system.
- B. The TMS configuration is stored in the database and the file system.
- C. The transport profile for the transport control program tp is generated in the database.
- D. The user TMSADM is created.

E. The RFC destinations required for the TMS are generated.

Correct Answer: ABDE

QUESTION 4

Due to parameter maintenance, you need to stop (and later restart) the SQL Server instance. How can you perform this? (Choose three)

- A. Stop the service SQL Server (MSSQLSERVER) in Administrative Tools >> Services.
- B. Stop the SQL Server instance in the SAP System Management Console (sapmmc).
- C. Stop the SQL Server in SQL Server Management Studio.
- D. Stop the service SQL Server (MSSQLSERVER) in Administrative Tools >> Services. To perform the stopping (and restarting) as quickly as possible, answer the question whether you also want to stop the service SQL Server Agent (MSSQLSERVER) with '\\No\\'.
- E. Stop the service SQL Server (MSSQLSERVER) in the SQL Server Configuration Manager.

Correct Answer: ACE

QUESTION 5

What is the name of the program on the operating system level that is used when an ABAP program calls an external program?

- A. saposcol
- B. disp+work
- C. sap_ext_prog
- D. sapxpg

Correct Answer: D

QUESTION 6

Concerning some (CCMS) monitoring terminology, which of the following statements are correct? (Choose three)

- A. Each MTE can only be used in exactly one customer-defined monitor definition at a time.
- B. Each monitoring attribute is assigned to exactly one monitoring object.
- C. A monitoring attribute is also a monitoring tree element (MTE).
- D. A monitoring object can have more than one assigned monitoring attribute.

Correct Answer: BCD

QUESTION 7

For which of the following options do you need to install and configure SAProuter? (Choose two)

- A. EarlyWatch session done remotely by an employee of SAP
- B. Create a support message in case of problems with the SAP system
- C. Remote Consulting from SAP
- D. Connection to <http://help.sap.com>.

Correct Answer: AC

QUESTION 8

Which of the following statements regarding the authorization concept in AS ABAP based SAP systems (for example, SAP ECC) are correct?

- A. Special authorizations are required to define users in SAP systems.
- B. Authorizations are used in SAP systems to control access to data and functions.
- C. Users defined in SAP systems automatically receive authorizations for the database level and the operating system level.
- D. To maintain security in SAP systems, the users SAP* and DDIC should be copied and then deleted.

Correct Answer: AB

QUESTION 9

Which traces can be switched on and off from within the SAP system without restarting the instance? (Choose two)

- A. Buffer Trace
- B. SYSLOG Trace
- C. SQL Trace for ABAP-based applications

Correct Answer: AC

QUESTION 10

Which ABAP software components are installed during the installation of an SAP ECC 6.0 system? You find those in System -> Status of your SAP ECC 6.0 system. (Choose two)

- A. SAP_APPL

B. SAP_CRM

C. SAP_HR

Correct Answer: AC

QUESTION 11

Which tools in the SAP NetWeaver AS 7.00 ABAP and Java Stack are responsible for the registration process in the System Landscape Directory (SLD)? (Choose two)

A. The whole mechanism to register an ABAP based SAP system is event triggered. Once a change in the configuration happens, a background job informs the SLD.

B. The transaction RZ21 allows the configuration of the SLD connection.

C. SAP systems based on AS Java cannot register to the SLD.

D. SAP systems based on AS Java can register to the SLD using the SLD Data Supplier Service in Visual Administrator.

E. The main ABAP transaction to inform the SLD is RZ70. The SAP gateway is involved.

Correct Answer: DE

QUESTION 12

If you look at the following screenshot taken from an SAP Management Console (SAP MC), which statement about the status of the SAP system DEV is correct?

A. The dialog instance D01 of SAP system DEV is stopped.

B. The database belonging to SAP system DEV is in status "blue". This means that the SAP system is going to be stopped in a few minutes.

C. Some processes of the SAP system DEV are not running.

Correct Answer: C
