QUESTION 1

Which of the following will help prevent a rollover?

- A. Keep the cargo load centered on the rig
- B. Drive slowly around turns
- C. Keep the cargo as close to the ground as possible
- D. All of the above

Correct Answer: D

The correct answer is: All of the above. Risk of rollover is increased by a high center of gravity. Keeping the cargo as close to the ground will lower the center of gravity and decrease the risk of rollover. Keeping the cargo centered and driving slowly around curves will also help reduce the risk of a rollover.

QUESTION 2

What factors determine your selection of a safe speed when going down a long, steep downgrade?

- A. Length of the grade and steepness of the grade only.
- B. Total weight of the vehicle and cargo.
- C. Total weight of the vehicle and cargo, length of the grade, steepness of the grade, road conditions, weather.
- D. Total weight of the vehicle, steepness of the grade, weather.

Correct Answer: C

QUESTION 3

How do you test hydraulic brakes for leaks?

- A. Pump the brake pedal five times, apply firm pressure for 3 seconds, the pedal should not move.
- B. Hold the brake down for 5 seconds and listen for leaks.
- C. Pump the brake pedal three times, apply firm pressure for 5 seconds, the pedal should not move.
- D. Move slowly forward and step on the brake hard.
- E. Any of the above.

Correct Answer: C

QUESTION 4

Which of the following is the most common type of foundation brake?

- A. Wedge brake
- B. S-cam drum brake
- C. Disc brake
- D. Anti-lock brake

Correct Answer: B

The correct answer is: S-cam drum brake. Wedge brakes and disc brakes are foundation brake types that are much less common than S-cam drum brakes. Anti-lock brakes are an add-on component to an air brake system to help reduce lockup.

QUESTION 5

Your engine runs a pump used during delivery of compressed gas. Should you turn off the engine before or after unhooking hoses after delivery?

- A. Turn it off during product transfer, while unhooking the hose.
- B. Leave running until you leave
- C. Turn it off after product transfer, before you unhook the hose.
- D. Turn it off before product transfer, before you hook the hose.
- E. None of the above

Correct Answer: C

QUESTION 6

What must you check before transporting a sealed load?

- A. The placard numbers match the seal numbers.
- B. That the seal is authentic.
- C. That the seal is secure.
- D. The load is properly secured.

Correct Answer: D

QUESTION 7

Operating a motor vehicle with the intent of doing harm to others or physically assaulting a driver or their vehicle is known as?

- A. Aggressive driving
- B. Defensive driving
- C. Tailgating
- D. Road rage

Correct Answer: D

The correct answer is: Road rage. Road rage occurs when a drivers displays actions that are intended to cause violence or harm to other drivers. It is a more extreme case of aggressive driving because there is intent to injure or cause harm.

QUESTION 8

A fully loaded rig is _____ times more likely to roll over in a crash than an empty rig.

- A. 5
- B. 10
- C. 15
- D. 20

Correct Answer: B

The correct answer is: 10. When a truck has cargo, the center of gravity moves higher which increases the likelihood of rollover.

QUESTION 9

Why are baffles used in some tankers?

- A. To make the interior of a tanker easier to clean out
- B. To control forward-and-back liquid surge
- C. To eliminate side-to-side liquid surge
- D. To allow you the hauling of mixed loads

Correct Answer: B

The correct answer is: To control forward-and-back liquid surge. Baffles are bulkheads that have holes in them to let liquid flow through. Baffles help control forward and backward liquid surge but not side to side liquid surge. Baffles are harder to c

QUESTION 10

When driving in very hot temperatures, you should:

- A. Check your tires every 2 hours or every 100 miles
- B. Let your tires cool down (remain stopped) if they are too hot to touch
- C. Insure that you have enough antifreeze in the system
- D. All of the above

Correct Answer: D

The correct answer is: All of the above. When driving in extreme heat it is important to check your tires every 2 hours or 100 miles. If the tires are too hot to touch, you should remain stopped until they cool off. You should also insure that you have enough antifreeze in the system.

QUESTION 11

Name some things you should check on the front of your vehicle during the walk-around inspection?

- A. oil, transmission, air compressor, radiator
- B. Low beams, high beams, four way flashers, turn signals
- C. windshield, wipers, mirrors, hood latches
- D. tires, steering parts, suspension parts, headlights
- E. None of the above

Correct Answer: B

QUESTION 12

Which of the following driving practice is recommended for doubles/triples?

- A. Load heaviest semi-trailer in the rear position
- B. No special driving practices are recommended
- C. Allow more following distance
- D. Both A and C

Correct Answer: C

The correct answer is: Allow more following distance. Doubles and triples have longer stopping distances and require more following distance. The heaviest semitrailer should go in the first position, not the rear position.
