**Exam Code:**CLSSGB

**Exam Name:**Certified Lean Six Sigma Green Belt  
(CLSSGB)

**Version:**Demo

**QUESTION 1**

While management of a company must set the stage for all improvement efforts, which of these 5S's is primarily driven by management?

- A. Straighten
- B. Sort
- C. Shine
- D. Sustain

Correct Answer: D

---

**QUESTION 2**

The 80:20 rule is associated with which of these tools?

- A. Pareto Chart
- B. Simon's Cross-Functional Tool
- C. SIPOC
- D. Framing Tool

Correct Answer: A

---

**QUESTION 3**

Cost of Poor Quality (COPQ) can be classified as either Tangible (Visible) Costs or Hidden Costs.

- A. True
- B. False

Correct Answer: A

---

**QUESTION 4**

The Alpha level of a test (level of significance) represents the yardstick against which P- values are measured and the Null Hypothesis is rejected if the P-value is which of these?

- A. Less than the Alpha level.
- B. Greater than the Alpha level.
- C. Greater than the Beta and Alpha level.

- D. Less than one minus Alpha.
- E. Less than the power of one minus Beta.

Correct Answer: A

---

#### QUESTION 5

Lean focuses on the sequence of activities and work required to produce a product or a service. This flow is called a \_\_\_\_\_.

- A. Value-add Flow
- B. Production Map
- C. Value Stream
- D. Operating Procedure

Correct Answer: C

---

#### QUESTION 6

The actual experimental response data varied somewhat from what a Belt had predicted them to be. This is the result of which of these?

- A. Inefficiency of estimates
- B. Residuals
- C. Confounded data
- D. Gap Analysis

Correct Answer: B

---

#### QUESTION 7

For the data shown here a Belt suspects the three grades are supplying the same results. Which statement(s) are true for proper Hypothesis Testing?

- A. The most appropriate Central Tendency to test is the Means
- B. An appropriate test to test Central Tendency is the Levene's test
- C. An appropriate test to test Central Tendency is the ANOVA test
- D. An appropriate test to test Central Tendency is the Mood's Median test

Correct Answer: D

---

**QUESTION 8**

Contingency Tables are used to do which of these? (Note: There are 2 correct answers).

- A. Illustrate one-tail proportions.
- B. Compare more than two sample proportions with each other.
- C. Contrast the Outliers under the tail.
- D. Analyze the "what if" scenario.
- E. Applicable to data that is Attribute in nature

Correct Answer: BE

---

**QUESTION 9**

If a process has Outliers which pair of charts is most preferable if subgroups will exist for the Continuous Data?

- A. Individual-Moving Range
- B. Xbar-R Charts
- C. Xbar-S Charts
- D. nP and P Charts

Correct Answer: B

---

**QUESTION 10**

Measurement System Analysis is a procedure used to quantify all \_\_\_\_\_ in the method or system used for taking measurements.

- A. Totals
- B. People involved
- C. Variation
- D. Summations

Correct Answer: C

---

**QUESTION 11**

To create standardization of financial benefit calculations project savings are typically based on savings over what period of time?

- A. 6 months
- B. 12 months
- C. 24 months
- D. The remainder of the calendar year
- E. The remainder of the fiscal year

Correct Answer: B

---

#### **QUESTION 12**

To draw inferences about a sample population being studied by modeling patterns of data in a way that accounts for randomness and uncertainty in the observations is known as \_\_\_\_\_.

- A. Influential Analysis
- B. Inferential Statistics
- C. Physical Modeling
- D. Sequential Inference

Correct Answer: B
