Exam : **E22-192**

Title : Captiva Installation, Configuration, and Management Exam

Version : Demo

1.An Administrator reinstalls the InputAccel Server on new hardware after a disastrous hardware failure. The Administrator uses the original CAF and LIC files from eighteen months ago to activate and license the new server.

Why will this result in a non-functioning server?

A. The original CAF file contains invalid EnterBy dates

B. The original CAF file cannot be used on different hardware

C. The original LIC file cannot be used on different hardware

D. The original LIC file contains invalid EnterBy dates **Answer:**

B

2.An Administrator receives new system requirements where the barcode contains multiple lines of data. Which filter is used to read the barcode.?

A. Extended Bar Code Detection

B. Patch Code Detection

C. Bar Code Detection

D. Postal Bar Code Detection

Answer: A

3.Which steps are required to upgrade an InputAccel process to use replaced modules when migrating from InputAccel 5.3 to 6.x?

No additional steps are required to migrate processes

A. 1. Open IPP in Process Developer

  Recompile

  Reinstall"

B. 1. Open IPP in Process Developer

  Include new MDF files

  Modify to include new module names

  Recompile

  Reinstall"

C. 1. Open IPP in Process Developer

  Add prepare routines for all new modules

  Set manual retriggering

  Include new MDF files

  Modify IPP to include new module names

  Recompile

Reinstall"

Answer: B

4.Email import module supports POP3, POP3 SSL, and which other email protocol?

A. IMAP4

B. HTTP

C. MIME

D. MAPI

Answer: A

5.System requirements have been verified and InputAccel is ready to be installed. What is the correct order of items to be installed?

A. 1. InputAccel Database
 InputAccel Server
 Administration Console
 Dispatcher for InputAccel client modules"

B. 1. InputAccel Database
 InputAccel Server Web
Services Administration
Console InputAccel client
modules" C. 1. InputAccel
Server InputAccel Database
Administration Console
InputAccel client modules"

D. 1. InputAccel Database
InputAccel Server
Administration Console
InputAccel client modules"

Answer: D

6.Which module is used to automatically identify templates defined in a Dispatcher project?

A. Dispatcher manager

B. Classification Edit

C. Classification

D. Validation

Answer: C

7.Which module enables end users to perform quality assurance on scanned images and document assembly?

A. IndexPlus

B. Image Enhancement

C. RescanPlus

D. NuanceOCR

Answer: C

8.Which component is required to run a report?

A. VBA code

B. Stored procedure

C. Client-Side Scripting

D. IPP code

Answer: B

9.What is one virtualization product that is compatible with InputAccel?

A. VirtualBox

B. XenServer

C. Hyper-V D.

OracleVM

Answer: B

10.What is required to synchronize the InputAccel Server to the InputAccel Database when moving the database onto a new machine?

A. Reinstall ODBC Component

B. Reinstall InputAccel Server Component

C. Run Data Access Layer registration utility

D. Restart InputAccel service

Answer: C

11.In efforts to tighten InputAccel security, the Administrator is creating a new Supervisor role. The Supervisor role should have access to the Administration Console and should be able to run client modules.

What needs to be applied to the new Supervisor role?

A. Role members

B. Windows users and groups

C. Permissions

D. Access Control Lists (ACL)

Answer: C

12.A customer is required to send (and not return) InputAccel data to an external system via Web Services.

Which component is responsible for this exchange of information?

A. Web Services Output

B. Web Services Coordinator

C. Web Services Hosting

D. Web Services Export

Answer: A

13.An end user needs to export a batch from the InputAccel Server using a system that does not have client modules installed.

Which mechanism can be used to export the batch to a different directory as a zip archived file?

A. IACopy

B. Multi-Directory Watch

C. File System Export

D. Administration Console

Answer: D

14.A Developer modifies an IPP that was generated by CaptureFlow Designer.

Where can the IPP be maintained going forward?

A. CaptureFlow Designer

B. Dispatcher Manager

C. Process Developer

D. Free Form Designer

Answer: C
