QUESTION 1

A drug ending in the suffix (azole. is considered a _.

- A. H2 agonist
- B. ACE inhibitor
- C. Antifungal
- D. Beta agonist

Correct Answer: C

QUESTION 2

An oral chelating agent used in the treatment of rheumatoid arthritis is:

- A. Allopurinol
- B. Sulphinpyrazone
- C. Indomethacin
- D. Penicillamine
- E. Methotrexate

Correct Answer: D

QUESTION 3

All are 2-agonists used as brochodilators in the treatment of bronchospasm, EXCEPT:

- A. Albuterol
- B. Salmeterol
- C. Terbutaline
- D. Pindolol
- E. Levalbuterol

Correct Answer: D

QUESTION 4

Examples of extended spectrum penicillin may include:

- A. Amoxicillin
- B. Ampicillin
- C. Cloxacillin
- D. Carbenicillin
- E. Dicloxacillin

Correct Answer: D

QUESTION 5

Mechanism of action of chlorthalidone is:

- A. Mitotic spindle poison
- B. Binds to ergosterol in cell membrane resulting in formation of pores.
- C. Unknown
- D. Induces "freezing" of initiation complex
- E. Inhibits Na-Cl transporter

Correct Answer: E

QUESTION 6

All of the following are pathophysiologic characteristics of asthma, EXCEPT:

- A. Airway obstruction and inflammation
- B. Destructive changes in the alveolar walls
- C. Thickened smooth muscle of airway
- D. Mucosal edema
- E. Narrowed lumen of airway

Correct Answer: B

QUESTION 7

Which of the following statements refers to pyrazinamide?

- A. Accumulates inside mycobacteria
- B. Effects: vasodilator in CHF patients; vasodilator and inotropic in normal individuals.

- C. Is active in acidic environment, therefore especially useful for killing intracellular mycobacteria
- D. Nephrotoxicity is almost always reversible.
- E. Lupus occurs more commonly in slow acetylators.

Correct Answer: C

QUESTION 8

The level of which drug should be adjusted during treatment with allopurinol

I- Mercapturic acid II- Theophyllin III- Anticoagulants

- A. I only
- B. III only
- C. I and II only
- D. II and III only
- E. All are correct

Correct Answer: E

QUESTION 9

Which of the following is an essential amino acid?

- A. Histadiol
- B. Cysteine
- C. Methionine
- D. Aspartene
- E. Glutamine

Correct Answer: C

QUESTION 10

All are examples of antihelmintic drugs, EXCEPT:

- A. Niclosamide
- B. Praziquatel

C. Mebendazole

D. Dapsone

E. Thiabendazole

Correct Answer: D

QUESTION 11

Mechanism of action of neomycin is:

A. Inhibits dihydropteroate synthetase

B. Blocks K channels

C. Blocks Na channels

D. Binds to 30S subunit of bacterial ribosome

E. Inhibits mycolic acid synthesis

Correct Answer: D

QUESTION 12

The above structures are related to one another as:

A. bioisosteres

B. enantiomers

C. homologs

D. rotamers

E. positional (structural) isomers

Correct Answer: C
