Exam Code:H11-828

Exam Name:HCNP-UC(Fast Track)(Unified Communication (Fast Track))

Version: Demo

QUESTION 1

Which of the following components provide the directory interface for eSpace Mobile? (Multiple Choice)

A. BMU

B. eServer

C. MAA

D. AppAgent

Correct Answer: CD

QUESTION 2

In a multi-node centralized network, there is a central node with a U1981 deployed and a branch node with a U1911 deployed. When POTS user A under U1911 calls an external PSTN user through the branch node\\'s EI trunk, the path along which the call\\'s SIP signaling is transmitted is:

A. U1911->U1981->U1911

B. U1981->U1911

C. U1911->U1981

D. U1981

Correct Answer: A

QUESTION 3

The default eSpace user statuses include (). (Multiple Choice)

A. Busy

B. Away

C. Online

D. Offline

E. On Vacation

Correct Answer: ABCD

QUESTION 4

An enterprise with about 2,500 IP phones has purchased three U1960s. Which network mode is suitable for these three

U1960s?

A. Multi-node centralized call management network

B. Distributed call management network in peer-to-peer mode

C. Distributed call management network in convergent mode

Correct Answer: B

QUESTION 5

One BMU can connect to multiple U1900 series unified gateways.

A. TRUE

B. FALSE

Correct Answer: A

QUESTION 6

In a multi-node centralized network, the status of SIP users of the local node is normally displayed as () on the local node.

A. idle

B. fault

C. busy

Correct Answer: B

QUESTION 7

eSpace Desktop A and eSpace Mobile B register with the same eServer and are both online. If A transfers a file to B, the path along which the file is transferred is ().

A. A->B

B. A->eServer->B

C. A->eServer->MAA->B

D. A->MAA->eServer->MAA->B

E. A->MAA->eServer->B

Correct Answer: A

QUESTION 8

An enterprise has deployed devices such as IP PBXs and eServers, The enterprise requires that the call records of employees (fewer than 50 persons) in a special position be traceable. In consideration of costs, which of the following deployment modes is the most suitable?

A. Add a recording system. Components of the recording system can be co-deployed on the same server.

B. Add a recording system. The recording server can be independently deployed.

C. Add the UMS component.

D. Retain the existing devices.

Correct Answer: A

QUESTION 9

You can collect logs on eSpace clients, including log files generated during client operation and system information.

A. TRUE

B. FALSE

Correct Answer: A

QUESTION 10

Only one Meeting MS server has been deployed in an enterprise. The administrator needs to enable the () function on the MS to support multimedia conference services on both internal and external networks.

A. Redirection

B. Automatic cascading

C. Intelligent routing

D. Multiple listening

Correct Answer: D

QUESTION 11
