Vendor:Juniper

Exam Code:JN0-1100

Exam Name:Juniper Networks Certified Design
Associate

Version:Demo

QUESTION 1

SRX Series devices support which type of HA feature?

- A. logical systems
- B. HSRP
- C. chassis clustering
- D. Virtual Chassis

Correct Answer: C

QUESTION 2

You are asked to examine the infrastructure requirements needed to provision a new network build in support of a customer who wants to take advantage of their service provider's MPLS/VPN offering.

Which three considerations would be relevant to this work? (Choose three.)

- A. supplicant roles in the current network layout
- B. server hypervisor and host OS selection
- C. backdoor connectivity requirements
- D. IGP protocols deployed in the customer environment
- E. site-to-site versus site-to-hub communications

Correct Answer: CDE

QUESTION 3

What are two phases in Juniper's lifecycle approach when designing a network? (Choose two.)

- A. plan
- B. build
- C. buy
- D. oversee

Correct Answer: AB

QUESTION 4

You are consulting in a network architect role for a multinational corporation. As part of your contract, you have been asked to propose an update to the company's network design. You have completed the initial design draft.

Which statement describes what you should do next in your project?

- A. Begin to plan for a proof-of-concept demonstration to show why your design is superior to the current network.
- B. Schedule a time with the board of directors to present the proposed solution.
- C. Schedule the first phase of implementation.
- D. Share the design with the other network administrators and solicit feedback.

Correct Answer: D

QUESTION 5

What are three advantages of out-of-band (OoB) management over in-band management? (Choose three.)

- A. OoB allows the use of Telnet as a management protocol.
- B. OoB provides increased network security.
- C. OoB is more cost-effective when purchasing equipment.
- D. OoB provides more reliable management access.
- E. OoB frees up network bandwidth on campus switches.

Correct Answer: BDE

QUESTION 6

Which statement describes a data center?

- A. The data center locally hosts thousands of users with wired connections, all with three to four active devices.
- B. The data center typically involves high density topologies with multiple points of access.
- C. The data center encompasses a broad area that is used to interconnect business locations and resources.
- D. The data center houses the computing resources and services used by a company.

Correct Answer: D

QUESTION 7

Virtual Chassis solutions for large campus networks are designed to eliminate the requirement for which protocol?

- A. SNMP

- B. IPv6
- C. OSPF
- D. STP

Correct Answer: D

QUESTION 8

You are planning to add equipment into a data center environment. What are three physical environmental considerations? (Choose three.)

- A. IP addressing
- B. floor loading
- C. rack door positioning
- D. VLAN assignments
- E. hot/cold aisle deployment

Correct Answer: BCE

QUESTION 9

You are asked to secure a branch location in your network.

Which two actions would accomplish this task? (Choose two.)

- A. Configure an IPsec VPN back to headquarters.
- B. Configure MC-LAG on the branch's edge router.
- C. Separate VLANs for each user group.
- D. Configure OSPF areas in the core.

Correct Answer: AC

QUESTION 10

What are two features used to enable high availability? (Choose two.)

- A. VRRP
- B. chassis clustering
- C. full duplex mode

D. SNMP

Correct Answer: AB

QUESTION 11

You are working on a campus design for a customer who has acquired a building across the street from the main facility. The recently acquired building was built in 1979 and has not been updated to support the demands of current network technologies. The building must support high-speed network connections for all users working at the location.

Which two elements would you consider when analyzing connectivity and throughput requirements for this new location? (Choose two.)

- A. the hierarchical modules used within each group at the new location
- B. the data received from a traffic analysis
- C. the condition of the physical media at the new location
- D. the type of business the customer is in

Correct Answer: BC

QUESTION 12

Which type of platform would be used to correlate data and logs from many different network and security appliances?

- A. Juniper Secure Analytics
- B. MX Series routers
- C. Pulse Secure
- D. QFabric

Correct Answer: A
