### QUESTION 1

Your customer requires some users to be mapped to a specific role. The Active Directory (AD) administrator frequently changes users from one AD group to another. Which role mapping rule type should you use?

- A. the user's group membership returned by the realm's authentication server
- B. the result of a host check rule for machine certificate
- C. the authentication realm accessed
- D. the user's username and NetBIOS name

Correct Answer: A

---

### QUESTION 2

-- Exhibit ?

Welcome to the  
**Pulse, Inc. Secure Portal**

You are not allowed to sign in. Please contact your administrator.

-- Exhibit -Referring to the exhibit, which statement is correct?

- A. The user has attempted to sign in using an invalid authentication server.
- B. A role-mapping rule has not been defined for the user.
- C. The user has mistyped their username or password.
- D. The authentication server that the user is authenticating to has rejected their credentials.

Correct Answer: B

---

### QUESTION 3

You have configured RADIUS authentication on the Junos Pulse Secure Access Service. Users report that their authentication is rejected. The RADIUS administrator reports that the RADIUS server requires a specific attribute that identifies the Junos Pulse Secure Access Service on the RADIUS server.

In the Admin UI, which configuration parameter will address this issue?

- A. Name
- B. NAS-Identifier
- C. RADIUS Server
- D. Shared Secret

Correct Answer: B

---

#### **QUESTION 4**

Which Junos Pulse Secure Access Service element controls the location awareness rules settings for the Junos Pulse client?

- A. Junos Pulse component set
- B. Junos Pulse connection set
- C. User role restrictions
- D. User role session options

Correct Answer: B

---

#### **QUESTION 5**

You want to use ESP for your VPN Tunneling transport mechanism.

Which port must you have open on your firewall to the Junos Pulse Secure Access Service in a default configuration?

- A. UDP 500
- B. TCP 500
- C. UDP 4500
- D. TCP 4500

Correct Answer: C

---

#### **QUESTION 6**

Users access the Junos Pulse Secure Access Service from home using a specific connection.

When the same users access secured resources in the office, they must connect to the Junos Pulse Access Control Service using a different connection. You want to make the user connection automatic when they launch Junos Pulse.

Which Junos Pulse feature should you configure?

- A. Connection Awareness
- B. Location Awareness
- C. Location Services
- D. Connection Services

Correct Answer: B

---

#### **QUESTION 7**

Remote access users must maintain connectivity to printers on their local network when they launch their VPN tunnel and are connected with split tunneling disabled.

In the Admin UI, which VPN Tunneling setting would allow this?

- A. Enable Tunnel routes under Route Precedence.
- B. Enable Route Monitor.
- C. Enable Endpoint routes under Route Precedence.
- D. Disable Route Monitor.

Correct Answer: C

---

#### **QUESTION 8**

What are three ways a Junos Pulse connection is initiated to a Junos Pulse Secure Access Service? (Choose three.)

- A. The connection is initiated when the Web browser requires that a VPN tunnel be established.
- B. The connection is initiated after the user signs in to the PC.
- C. The user manually initiates a connection.
- D. The connection is initiated after the PC starts.
- E. The connection is initiated only if application acceleration is enabled.

Correct Answer: BCD

---

**QUESTION 9**

What are three benefits that resource profiles provide over resource policies? (Choose three.)

- A. Resource profiles provide automatic mapping of users to roles.
- B. Resource profiles provide a simplified process for creating bookmarks and resource policies.
- C. One profile can be assigned to multiple roles.
- D. Resource options can be customized for each profile.
- E. Resource profiles provide a simplified process for configuring applications such as VPN tunneling.

Correct Answer: BCD

---

**QUESTION 10**

When adding a new cluster member, the cluster node state is indicated by a yellow radio button icon in the Admin UI. Which cluster node state is correct?

- A. The node is enabled, not accepting user requests.
- B. The node is transitioning.
- C. The node is enabled, unreachable.
- D. The node is disabled.

Correct Answer: B

---

**QUESTION 11**

You want to use Host Checker to verify that users have a specific version of application software. Which two Host Checker rules in the Admin UI would achieve this? (Choose two.)

- A. Predefined Rule. OS Checks
- B. Custom Rule. Patch Assessment
- C. Custom Rule. Registry Setting
- D. Custom Rule. NetBIOS

Correct Answer: BC

---

**QUESTION 12**

A user must communicate with a server-initiated connection through the Junos Pulse Secure Access Service. Which access method must be available to the user for this to be accomplished?

- A. browser-based access
- B. Network Layer access
- C. Application Layer access
- D. core access

Correct Answer: B
