Exam Name:IBM FileNet Image Services
Administration and Support Mastery Test v1

Version:Demo

QUESTION 1

Which of the following uses REST APIs?

- A. Content Engine Web Services (CEWS).
- B. Content REST Adapter Pattern.
- C. Content Management Interoperability Services (CMIS).
- D. CE .NET API or CE Java API are equally good for REST, if CEWS transport is used.

Correct Answer: C

QUESTION 2

A document comes into the company and you need a select list of individuals to process the document before it can be moved to the next step.

What would you use within a workflow to accomplish this scenario?

- A. Workgroup
- B. Personal Queue
- C. Work Queue
- D. Component Step

Correct Answer: A

QUESTION 3

The CE Java and .NET APIs include a mechanism called "fetchless instantiation". Which of the following best describes that mechanism?

- A. Documents and annotations can be fetched from the CE server without fetching their content.
- B. An in-memory programming language instance of an object can be created without fetching it from the CE server.
- C. Via drag-and-drop in a web application, multiple objects can be created without future user interaction.
- D. New objects can be created with a null value for the Owner property.

Correct Answer: B

QUESTION 4

What is the primary use of FileNet Deployment Manager?

- A. Deployment of custom jar files into the selected J2EE server.
- B. Deployment of the base application into the selected J2EE server.
- C. Propagating patched files to IBM supplied applications as part of maintenance operations.
- D. Propagating incremental sets of changes from a source environment to a subset of the existing objects in a destination environment.

Correct Answer: D

QUESTION 5

Which of the following is NOT a standard, out-of-the-box feature of P8 security?

- A. There is a mechanism for default permissions by document class.
- B. There is a mechanism for automatically adjusting permissions during checkout/checkin cycles.
- C. Security can be modified individually on business objects.
- D. There is a mechanism for automatically adjusting permissions based on date and time.

Correct Answer: D

QUESTION 6

Which of the following is the current framework recommended by IBM for building rich interactive web-based content applications?

- A. IBM Rational Data Architect.
- B. Workplace Web Application Toolkit (WAT).
- C. Administration Console for Content Platform Engine (ACCE).
- D. IBM Content Navigator (ICN).

Correct Answer: D

QUESTION 7

The CE has discoverable, self-describing meta data. Which of the following things can NOT be discovered through CE meta data?

- A. The path to individual content elements stored in a file system.
- B. The names of database tables and columns where custom property values are stored.

- C. The hierarchy of document classes and the point in the hierarchy at which custom properties are added to classes.
- D. Information about referential integrity checks that will be performed by the CE server when creating, updating, or deleting objects.

Correct Answer: A

QUESTION 8

Which of these are TYPICAL uses for extending P8 with subscription event handlers?

- A. Generating nightly statistical reports of the numbers of documents using storage areas.
- B. Checking a database partition for adequate space before storing large content.
- C. Monitoring server environmental factors like temperature and power consumption.
- D. Launching a workflow in response to a document creation, modification, or deletion.

Correct Answer: D

QUESTION 9

Which is NOT a characteristic of a workflow definition?

- A. It is a graphical map showing the sequences of steps needed to complete the business process.
- B. Contains roles to specify which users can access specific types of work flows.
- C. It is a specification of each step, including who will process the work for the step, which step processor application the participant will use, which attachments are required, what data is necessary, what responses the participant can choose, and other options.
- D. Contains routing logic that specifies how work advances from one step to the next.

Correct Answer: B

QUESTION 10

Which type of asset CANNOT be exported or imported using FileNet Deployment Manager when deploying an application?

- A. File Storage areas
- B. Property definitions
- C. Stored searches
- D. Class definitions

Correct Answer: A

QUESTION 11

What tool is NOT used during export/import of Process Engine assets?

- A. FileNet Deployment Manager.
- B. FileNet Process Administration Console.
- C. FileNet Process Task Manager.
- D. FileNet Process Designer.

Correct Answer: B

QUESTION 12

In what significant functional way or ways do the CE Java and .NET APIs differ?

- A. Only the CE .NET API can use Content Management Interoperability Services (CMIS) as a transport.
- B. They have different authentication techniques and distributed transaction handling.
- C. The CE Java API cannot use web services as a transport.
- D. The CE .NET API uses OLEDB for executing CE SQL queries.

Correct Answer: B
