Vendor:Veeam

Exam Code:VMCE2021

Exam Name:Veeam Certified Engineer 2021

Version:Demo

QUESTION 1

Veeam Explorer for Microsoft Active Directory offers which of the following capabilities? (Choose two.)

- A. Send an object/container as an attachment via email
- B. Support for Microsoft Active Directory on Windows Server 2000 or newer
- C. Restore a container to an Active Directory Domain Services server
- D. Restore a single object to an Active Directory Domain Services server
- E. Export an object/container as a Personal Folder File (.pst)

Correct Answer: CD

QUESTION 2

How does Veeam Backup and Replication check backup consistency for VMs verified by the SureBackup job?

- A. CBT reset
- B. RSA key consistency check
- C. MD5 check
- D. CRC check

Correct Answer: D

QUESTION 3

Which one of these functionalities relies on the guest OS file system indexing?

- A. Zeroing out dirty blocks
- B. Searching within Veeam Backup Enterprise Manager
- C. Multi-OS file-level restore
- D. Application-aware processing

Correct Answer: B

QUESTION 4

The backup administrator configured replication for a VM from Data Center 1 to Data Center 2, which runs every day at 1 a.m. A power surge takes out Data Center 1 at 7 a.m. and the administrator fails over the replica at 8 a.m. When the power comes back on, the administrator performs the "failback" action at 2 p.m. and checks the state of the original VM.

They recognize that not all data is available. What is missing?

- A. Data from 1 a.m. to 7 a.m.
- B. Data from 1 a.m. to 2 p.m.
- C. Data from 8 a.m. to 2 p.m.
- D. Data from 7 a.m. to 8 a.m.

Correct Answer: A

<https://helpcenter.veeam.com/docs/backup/vsphere/failback.html?ver=100>

QUESTION 5

When is Veeam-provided (software level) encryption used for tape media?

- A. If the original backup file is not encrypted
- B. If the "Tape protection" option is selected by the user
- C. If the hardware encryption is disabled at the tape device level or not supported
- D. By default for all of the tape jobs

Correct Answer: C

https://helpcenter.veeam.com/docs/backup/hyperv/encryption_tape.html?ver=95

QUESTION 6

When a Windows server is added to Veeam Backup and Replication using the Add Server Wizard, which components are always installed to the server? (Choose the 2 appropriate options)

- A. Veeam Installer Service
- B. Veeam Data Mover Service
- C. Veeam Backup Restful API Service
- D. Veeam Backup Shell

Correct Answer: AB

https://helpcenter.veeam.com/docs/backup/hyperv/offhost_backup_proxy.html?ver=95

QUESTION 7

Which statements are true regarding Full VM restores? (select three)

- A. Direct SAN access is the fastest.
- B. Physical backup proxies provide multiple transport modes.
- C. Using a VM as backup proxy with HotAdd access to the source datastore reduces load on the network.
- D. Restoring to the original location mitigates the risk of operator's errors.
- E. Restoring to the original location the primary VM is automatically deleted before restore.

Correct Answer: ACE

QUESTION 8

What are some of the benefits of using replication from HP, NetApp or EMC storage snapshot compared to the regular replication process? (Choose the 2 appropriate options)

- A. Lower impact on WAN link
- B. Lower impact on production storage
- C. Lower RPO
- D. Lower RTO
- E. Higher transfer speed

Correct Answer: BC

QUESTION 9

Where is the Veeam CBT filter driver installed?

- A. On every managed backup proxy
- B. On every managed server
- C. On every managed VMware server
- D. On every managed Hyper-V or SMB 3.0 server

Correct Answer: D

QUESTION 10

Veeam Backup and Replication establishes the stabilization point during SureBackup verification according to which of the following algorithms? (Choose three.)

- A. Stabilization by heartbeat
- B. Stabilization by maximum allowed boot time

- C. Stabilization by resource allocation
- D. Stabilization by application group
- E. Stabilization by IP
- F. Stabilization by application test

Correct Answer: ABE
